

THE PROBLEM...

- Privacy Is Under Attack
- 4.5 billion data records breached in the last year alone
- White House Signal Scandal demonstrates vulnerabilities
- Nation-states, hackers, and corporations exploit communications
- Current smartphones prioritize convenience over security
- Ultra-secure phones are often hard to use or not compatible

THE i3 IS YOUR SOLUTION...

Hi3ro Secure Mode

End-to-end encrypted comms

Standard Android Experience

Full Google Play support

Dual-mode interface

Advanced Access Control

Vault for private data

Decentralized Protocols

No central servers

Peer-to-peer encryption

Avarana's Hi3ro System offers:

- Hardware solution with i3 Secure phones – Physical Security...not software
- Secure Server System – whether Avarana's decentralized system OR servers installed in custom data rooms for ultimate protection
- Avarana Mobile Device Management System (MDM) powered by AI, allows for additional protection and security to governments, military, Intelligence agencies and businesses
- Easy to Use security – no changing habits or phones

The Future of Mobile Security: The perfect Meld of Hardware and Software

- Next Gen Hardware and Software Secure solutions utilizing newly created IP, proven patents along with AI powered processing
- Protects Governments, Business and the Consumer
- As AI based attacks on communications, especially Mobile increases, hardware solutions, powered by AI, are the only protection
- Easy to Use security – no changing habits or phones
